EDUCATION

Vellore Institute of Technology

B.Tech in CSE with specialization in (AI/ML) – **CGPA: 8.54**

Bhopal, Madhya Pradesh

Expected 2026

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL

Web Development: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Tools & Platforms: Git, GitHub, Docker

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

EXPERIENCE

AI Model Trainer (Freelance), Outlier AI [↗](#)

Dec 2024 – Feb 2025

Remote

- **Executed RLHF (Reinforcement Learning from Human Feedback)** workflows to refine Generative AI models, specifically focusing on code generation capabilities.
- **Evaluated and debugged** AI-generated Python and C++ code, identifying logic errors, syntax issues, and edge-case failures to improve model accuracy.
- **Authored gold-standard technical responses** to serve as ground truth data for Supervised Fine-Tuning (SFT) of Large Language Models (LLMs).

PROJECTS

DocShield: Automated Document Verification System [↗](#) | *React.js, Tailwind CSS, JavaScript, REST APIs*

- **Spearheaded the frontend development** using **React.js** and **Tailwind CSS**, creating a responsive and intuitive interface for document verification workflows.
- **Designed and implemented reusable UI components**, optimizing the application's performance and ensuring a consistent design system across all user modules.
- **Collaborated with backend developers** to integrate verification endpoints, enabling the visualization of authentic document statuses on client-side dashboards.

Real-Time Currency Converter [↗](#) | *React.js, JavaScript, REST API, Tailwind CSS*

- **Developed** a real-time currency conversion web application using React.js that retrieves live exchange rates from a third-party REST API.
- **Abstracted** API logic into reusable **custom React hooks** to manage data fetching, loading states, and error handling efficiently.
- **Implemented** controlled components and state management to enable instant currency conversion based on user input and selected currencies.
- **Enhanced** application reliability by handling API failures and edge cases, ensuring consistent user experience.
- **Designed** a fully responsive UI using Tailwind CSS, optimized for multiple screen sizes.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional [↗](#)
